Mise en place de la page de localisation

Modification de where.html

Nous allons mettre en place la page de localisation. Une partie sera similaire à la page d'accueil :

```
<!DOCTYPE html>
<html lang="en">
      <head>
            <meta charset="UTF-8" />
            <meta name="viewport" content="width=device-width, initial-scale=1.0" /:</pre>
            <meta http-equiv="X-UA-Compatible" content="ie=edge" />
            <link rel="stylesheet" href="css/styles.css" />
            <script
                   src="https://kit.fontawesome.com/83f4286022.js"
                   crossorigin="anonymous"
            ></script>
            link
                   href="https://fonts.googleapis.com/css?family=0pen+Sans:300,400,700&d
                   rel="stylesheet"
            />
            <title>Café florette | Localisation</title>
      </head>
      <body>
            <header class="header">
                   <nav>
                          <h1>
                                <a href="./index.html">CAFE FLORETTE</a>
                         </h1>
                          <111>
                                <a href="./index.html">Accueil</a>
                                <a class="active" href="./where.html">Nous trouver</a>
                                <a href="./contact.html">Contact</a>
                          </nav>
            </header>
            <section class="where">
                   <div class="container">
                          <imq
                                class="where-img"
                                 src="https://dyma-images.s3.fr-par.scw.cloud/html-css/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/projects/project
```

```
alt="carte"
       />
       <div class="where-text">
         <h1 class="underline">0ù nous trouver</h1>
         < h3 >
           Métro : ligne <span class="chip chip-purple">4</span> - Odéon,
           <span class="chip chip-brown">11</span> - Mabillon
         </h3>
         Adresse: 131 Boulevard Saint-Germain, 75006 Paris
       </div>
      </div>
   </section>
   <footer>
      Copyright \&#9400; - florette - 2019
   </footer>
 </body>
</html>
```

Sur cette page, nous aurons la même partie nav mais ce sera le lien "Nous trouver" qui aura la classe active.

Nous aurons seulement une section avec l'image de l'emplacement du café, l'adresse et les accès en transport en commun.

Nous avons mis un titre de niveau h1 qui décrit bien le contenu de la page, nous avons également mis un titre h3 avec les lignes de métro.

Modification de styles.css

Il ne reste qu'à faire les sélecteurs et les règles CSS :

```
/* ... */
.underline {
  padding-bottom: 10px;
  border-bottom: 1px solid #ddd;
}

.chip {
  display: inline-block;
  text-align: center;
  width: 30px;
  border-radius: 100%;
  background: #333;
  color: white;
```

```
}
.chip-purple {
  background: #be418c;
}
.chip-brown {
  background: #8c5e24;
}
/* ... */
/* where */
.where {
  padding: 180px 0;
  overflow: auto;
 min-height: 100vh;
}
.where-img {
  float: left;
 width: 45%:
  border: 1px solid #ddd;
  border-radius: 5px;
}
.where-text {
  float: right;
  width: 50%;
}
```

underline permet de mettre une ligne donnant un effet de soulignement. Il s'agit en fait seulement d'une bordure sur un seul côté de 1px grise.

chip permet de créer une petite bulle. Nous utilisons une disposition inline-block pour pouvoir lui donner une taille et en mettre plusieurs sur la même ligne.

Les autres sélecteurs permettent simplement de donner la couleur adaptée pour l'arrière-plan des bulles.

Pour la section nous utilisons également la propriété float pour l'image et le texte. Nous utilisons overflow: auto pour le container.

Etape 6 du projet
